

## Johan Sylvan-PO Sundelin

### Double Club (or "JPklöver")

Some remarks about our system for those who do not intend to struggle through our whole system manual.

Our convention card is produced with Lee Edwards' CCE version 6.10. There may be a problem printing the back with later versions of the CCE. Unfortunately Lee does not seem inclined to add a PDF printing possibility.

**1C** - 1D = 0-7.

Opener may (rarely) pass, may also rebid a 3-card M if he lacks a longer one. (1NT shows 17-19)

Over **1M-openings** we use a 2C-relay (either Nat, constructive, Inv), OR FG, in principle any shape, but in real life seldom long suits (5+) outside C. Responses and mostly also continuation conventional.

**1NT** may contain any 5card suit. Sometimes a 5422 pops up, probably more frequently with 5C than any other suit.

Our **2S-opening** is a bit unusual; a good hand with both minors but less than 17+hp.

More precisely 5+D and 4+C, no 4+M. 4 - 5,5 losers, (12)13-16.

Example of 12hp-hand: X,-,AJTxxx,AQJxxx. More normal would be: AKx, x, ADJxx, QTxx

We use transfer methods

0. after 1NT (2D,H,S,3C,4C,D) and 1C (2H=C+D),2S,3C,3S=NT,4C,D)

1. when opponents bid 1X over 1C,

(D,1D,1H show next suit.

1S=neg double w/o own M,

2S=C,inv+ or C+D,FG

2Q=4441, FG with short Q

2Q-1 = 4oM and 5+m, Inv

1NT,2m =5+next suit, 8+hp)

2. After 1D-1NT

(2C=D,2D=H-reverse, 2H=S-reverse,2S=4441, max)

3. when our opening or interference with 1M is doubled (T-O or negative).

(1NT through 1M-1 either shows next suit, 0+hp, OR values in next suit plus support. 2M-1=good raise).

4. when we interfere with 1X

(New suit through 2Q-1 = Nat,F1, while 2Q through 2X-1 =next suit, F1)

### Signals

We may, if we remember, when partner leads a suit where he knows I am long, show interest in another suit by playing a **discouraging (high) card; odd for a higher ranking suit, and even for a lower suit.**

Please address any questions to [po-s@telia.com](mailto:po-s@telia.com) if you need further clarifications.
